Professional Summary

MCA student and backend developer with hands-on experience building REST APIs and backend services using Java, Spring Boot, Spring Security, SQL, and MongoDB. Developed 60+ API endpoints with API-key enforcement, rate limiting, role-based access control, and subscription validation. Experienced in debugging integration issues, validating application behavior, and implementing reliable backend workflows. Strong foundation in OOP, data structures, algorithms, and problem-solving, with additional programming experience in Python, C, and C++.

Technical Skills

Programming: Java, Python, C, C++, JavaScript, SQL, OOP
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, Hibernate/JPA, Microservices, API Integration
Databases: MySQL, PostgreSQL, MongoDB, DBMS, SQL Queries, Data Validation
Messaging & Caching: Apache Kafka, Redis, Asynchronous Processing, Event-Driven Workflows
DevOps & Tools: Docker, Git, GitHub, Maven, Postman, Swagger/OpenAPI, Ollama
Security & Engineering: Authentication, Authorization, RBAC, API Keys, Rate Limiting, Risk Controls, State Reconciliation, Testing, Debugging, Troubleshooting

Projects

AlgoPilot – Autonomous Algorithmic Crypto-Trading Platform Sep 2026 – Present
Java 21, Spring Boot, PostgreSQL, Flyway, Ollama, Gemini, Grok, Alpaca Paper API, Bybit Demo API, Docker

- Developing a safety-first automated trading platform that combines market data ingestion, technical indicators, structured LLM trading hypotheses, deterministic risk management, and broker execution.
- Implemented an AI-assisted decision pipeline using structured trading contexts and decision validation, separating LLM-generated BUY/SELL/NO_ACTION hypotheses from application-controlled execution.
- Implemented deterministic position sizing and risk checks covering exposure limits, drawdown, stale market data, spread, open orders, and duplicate-order safeguards before order authorization.
- Developed paper/demo trading workflows for order handling, position accounting, autonomous monitoring, and broker/database reconciliation, using PostgreSQL persistence and concurrency controls to support reliable state management.

API Marketplace MVP Aug 2026
Java 21, Spring Boot, MongoDB Atlas, ReactJS, REST APIs, Spring Security, Docker

- Developed backend services for API discovery, subscriptions, authentication, usage management, and administration using **Java and Spring Boot**.
- Built and integrated **60+ REST API endpoints** covering user, API, subscription, authentication, usage, and administrative workflows.
- Implemented **API-key enforcement, rate limiting, quota validation, RBAC**, and protected API request forwarding for secure service access.
- Designed MongoDB data models and integrated frontend-backend workflows while performing **API testing, debugging, and integration troubleshooting**.

AllIn1Loans.in – Agent Management Portal May 2025 – Jun 2025
PHP MVC, MySQL

- Built an agent management portal supporting authentication, role-based workflows, loan processing, and MySQL database operations.
- Implemented server-side validation and structured database workflows while debugging application and database issues.

Experience

AI Content Creator Intern – Elsa AI Ltd. Jun 2026 – Sep 2026

- Managed the founder's **Twitter/X content and engagement**, creating posts and replies around Crypto X AI, Tonkenisation, Stable Coins and product topics.
- Researched technology trends and monitored content performance to identify opportunities for **organic reach**.

Web Development Intern – Kanak Digifex Apr 2024 – Sep 2024

- Developed and maintained web applications using PHP, JavaScript, and MySQL based on client requirements and functional specifications.
- Troubleshot defects across existing application code and databases while maintaining expected application functionality.

Teaching Assistant – Disha Computers Institute Oct 2022 – Feb 2024

- Taught C, C++, Java, and Python to **120+ students** through practical coding sessions, exercises, and structured problem-solving activities.

Education

MCA (Pursuing) Expected 2027
Institute of Management Studies
BBA (CA) 2025
Ahmednagar College

Certification

Information Technology Excellence Program (ITEP) Aug 2025 – Aug 2026
Infobeans Foundation – Java, Spring Boot, REST APIs, MongoDB, Hibernate, ReactJS, OOP, Backend Development
